

Christina Tague, Bren School of Environmental Science and Management,  
University of California

Education: Engineering (University of Waterloo), Geography & Environmental Science  
(University of Toronto)

grew up in the wilds of Newfoundland ...a long way from sunny So-Cal

Lead developer of current version of RHESSys, code and  
support maintained in our Ecohydrology lab at UCSB;  
Janet Choate - user support

PI in the Western Mountain  
Initiative (a group of ecologists  
looking at climate change impacts  
in Western Mountains - 10 year old  
group!), part of CIRMOUNT

A PI in Sierra CZO (linking intensive field  
study with models); and LANL funded project  
- Water Security and Role of vegetation

Alter Ego: Teaching Shinui (a martial  
art/dance form)

Other research areas: urban ecosystems,  
vegetation water stress mortality, geology as  
a control on streamflow sensitivity to climate,  
assimilation of snow/veg data
